

## CITY OF EUREKA – AVERAGE MONTHLY PAYMENT PLAN

The City of Eureka is pleased to offer the Average Monthly Payment (AMP) plan which allows customers to average their utility costs over a period of time. Generally, an AMP billing is based upon the average of your monthly charges for the past twelve (12) months at your current location. This service can be especially helpful when water usage fluctuates during the year with summer irrigation and lower winter usage. It provides the ability to plan your budget! AMP bills are reviewed periodically, and will be recalculated as necessary to reflect any increases or decreases in your actual bills.

### ***You may enroll at any time!***

Even if you haven't been at your current location for a 12-month period, your bills can be averaged over whatever length of time you have been at that location.

### ***You may cancel the program at any time!***

You may cancel your AMP Plan at any time, at which time your next regular bill will be a "settlement" bill and will include all unpaid and current charges.

### ***How do I enroll in the plan?***

In order to qualify for the plan, your account must be current (no past due amounts). In addition, if AMP Plan payments are not made promptly, the account may become ineligible and be removed from the AMP Plan, at which time your next regular bill will be a "settlement" bill and will include all unpaid and current charges.

If you are interested in applying for the AMP Plan, complete the form below and return it with your next utility payment, or mail the form to City of Eureka Water Department, 531 K Street, Eureka, CA 95501-1165.
